Lab 6 - Code and Branch Coverage

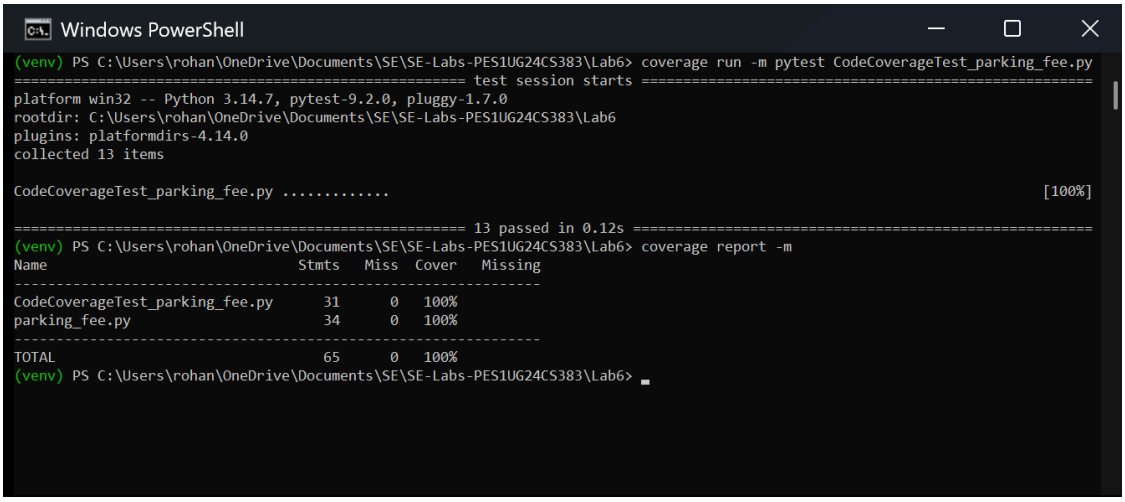

Name	: Rohan Suresh
SRN	: PES1UG24CS383
Section	: G
Assigned Repo	: https://github.com/SETAPESU26/L6_L7_19_parking_fee
My Repo	: https://github.com/RohanMay-Suresh/SE-Labs-PES1UG24CS383 (Lab6 folder)

Code coverage checks which lines ran during testing, branch coverage checks if every if/else went both ways. Both were measured on parking_fee.py using coverage and pytest.

Test file	Tests	Line coverage	Branch coverage
test_parking_fee.py (starter)	2	44%	40%
CodeCoverageTest_parking_fee.py	13	100%	98%
BranchCoverageTest_parking_fee.py	23	100%	100%

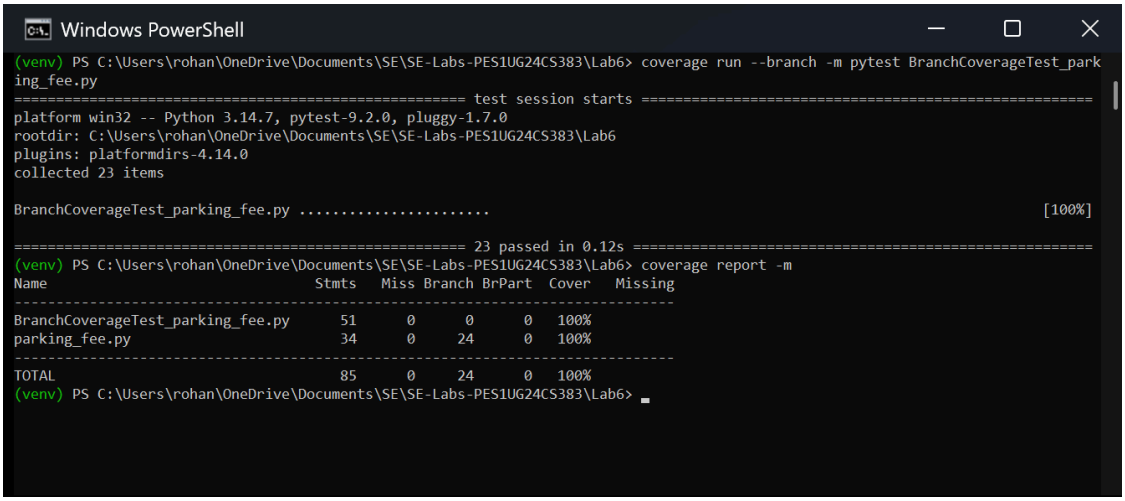

1. Code Coverage

Added tests for every function so all lines run. Branch 13->15 (stay of exact hours) was still not covered.

2. Branch Coverage

Added tests for exact hours, the 30/31 min boundary, EV truck, EV with lost ticket, full car park with disabled driver and all monthly pass cases.

Windows PowerShell
